

ACRYFILL 091

CHEMICAL COMPOSITION

Acrylate

CHARACTERISTICS

<i>Appearance:</i>	<i>milky liquid</i>
<i>pH in solution at 10%:</i>	<i>5 - 6</i>
<i>Phase:</i>	<i>watery</i>
<i>Product uses:</i>	<i>impregnation, prebottomings</i>

PROPERTIES

ACRIFILL 091 is a watery emulsion of acrylic copolymerized esters. **ACRYFILL 091** is an ideal binder for the impregnation of all types of leather and has good characteristics of elasticity and softness. Furthermore it has solvent resistance.
