

## ACRYFILL 18/B

### CHEMICAL COMPOSITION

Watery fixative of aliphatic polyurethane

#### CHARACTERISTICS

<i>Appearance:</i>	<i>milky white liquid</i>
<i>pH in solution at 10%:</i>	<i>8 - 9</i>

### PROPERTIES

**ACRYFILL 18/B** is a brilliant polyurethane compound to be applied as a final fixing ready for use. If necessary, it can be combined with other products that can opacify the film. Moderate quantities of polyaziridine or polyisocyanate crosslinkers can be added with the aim to increase the dry/humid rub-fastness resistance.
