

ACRYFILL 601

CHEMICAL COMPOSITION

Polyacrylate

CHARACTERISTICS

<i>Appearance:</i>	<i>milky white liquid</i>
<i>pH in solution at 10%:</i>	<i>7,5 - 8,5</i>
<i>Phase:</i>	<i>watery</i>
<i>Product uses:</i>	<i>bottomings, coverings</i>

PROPERTIES

ACRIFILL 601 is a self cross-linking acrylic dispersion resistant to dry/humid rubbing and solvents. It is suitable for full grain and buffed leathers intended for different uses and it is resistant to stapling. On evaporation of water phase it gives a medium soft film
