

ACRYFILL CFK

CHEMICAL COMPOSITION

Waxes and oils in cationic watery emulsion

CHARACTERISTICS

<i>Appearance:</i>	<i>watish liquid</i>
<i>pH in solution at 10%:</i>	<i>5 - 6</i>

PROPERTIES

ACRIFILL CFK is a no-forming auxiliary, soft and traslucent, which reduces the absorption of the leather surface while maintaining a gentle and soft fold. It can be easily glazed or rolled.

ACRYFILL CFK is appreciated for his soft and waxy hand.

As cationic bottoming, **ACRYFILL CFK**, can be used alone, diluted in water or with added of synthetic cationic polymer, like **ACRYFILL PW10**
