

ACRYFILL COUMPAUND 1

CHEMICAL COMPOSITION

Protein, polyamide

CHARACTERISTICS

<i>Appearance:</i>	<i>dense yellowish liquid</i>
<i>pH in solution at 10%:</i>	<i>7 - 8</i>
<i>Active substance:</i>	<i>18 - 20%</i>

PROPERTIES

ACRYFILL COUMPAUND 1 is a non-thermoplastic binder used by plating and glazing.

Its use is recommended also in finishings where a superior gloss grade, such as by "patiné" item, is requested.

ACRYFILL COUMPAUND 1 gives a film that is full, homogenous, brilliant and pleasant to touch, and is compatible with other proteic binders.
