

ACRYFILL COUMPOUND FT

CHEMICAL COMPOSITION

Polymer in watery emulsion and filler finely dispersed

CHARACTERISTICS

<i>Appearance:</i>	<i>milky liquid</i>
<i>pH in solution at 10%:</i>	<i>7,5 - 8,5</i>
<i>Ionic charge:</i>	<i>anionic</i>

PROPERTIES

ACRYFILL COUMPOUND FT is used for the finishing of articles embossed on buffed leathers and full grain.

ACRYFILL COUMPOUND FT, added in the bottoming, allows to reach very high percentage of pigments, improving the cover, maintaining optimum characteristics of the finishing.

We suggest to try the right relation with the pigment making preliminary tests.
