

## ACRYFILL FONDO ANC

### CHEMICAL COMPOSITION

Proteins, waxes, polyurethanes, polyacrylates

#### CHARACTERISTICS

<i>Appearance:</i>	<i>white liquid</i>
<i>pH in solution at 10%:</i>	<i>8 - 10</i>
<i>Phase:</i>	<i>watery</i>
<i>Use:</i>	<i>bottoms, covering coats for garment suede splits.</i>

### PROPERTIES

**ACRYFILL FONDO ANC** is a protein, wax and synthetic resin compound suitable for the production leather splits that will be given a nappa effect by spraying or by coating machine.

**ACRYFILL FONDO ANC** must be added of 10 : 15% of pigment and eventually solved with water to the wanted viscosity

Leather processed in this way is suitable for garments.
