

ACRYFILL PU 708

CHEMICAL COMPOSITION

Water phase polyurethane

CHARACTERISTICS

<i>Appearance:</i>	<i>milky white liquid</i>
<i>pH in solution at 10%:</i>	<i>8 - 9</i>
<i>Product use:</i>	<i>antiscratch finishing</i>

PROPERTIES

ACRYFILL PU 708 is a polyurethane resin in water emulsion free of solvents or cosolvents.

ACRYFILL PU 708 has been formulated with the aim to combine a fairly good flexibility with an exceptional film hardness. Therefore, it is indicated for obtaining antiscratch effects without finish breakage.
