

ACRYFILL PW10

CHEMICAL COMPOSITION

Aliphatic polyurethane in watery dispersion

CHARACTERISTICS

<i>Appearance:</i>	<i>milky liquid</i>
<i>pH in solution at 10%:</i>	<i>6,5 - 7,5</i>

PROPERTIES

ACRIFILL PW10 is a soft polyurethane, with extraordinary adhesion, high toughness and low tackiness. Can be improved, as adhesion promoter in aqueous systems and in mixtures containing solvents, prior reversal of glycol ethers.

ACRYFILL PW10 has a wide compatibility, both with cationic products that anionic, which makes it extremely versatile and present in many formulations with beneficial effects on adhesion, general fastness, the rheology and the hand much appreciated.
