

## ACRYFILL RPU SP841

### CHEMICAL COMPOSITION

Fixative based on aliphatic polyurethane

#### CHARACTERISTICS

<i>Appearance:</i>	<i>opalescent liquid</i>
<i>pH in solution at 10%:</i>	<i>8 - 9</i>

### PROPERTIES

**ACRYFILL RPU SP841** is a polyurethane resin in aqueous emulsion appropriately studied to bind to a discrete flexibility, an excellent surface hardness of the film.

It is suitable for brilliant final fixatives, solid to scratching and is miscible with our opaque polyurethanes, in order to obtain final effects satin or matt.
