

ACRYFILL TOP MV

CHEMICAL COMPOSITION

Solution of modified protein based matters

CHARACTERISTICS

<i>Appearance:</i>	<i>dense liquid</i>
<i>Active matter:</i>	<i>about 18%</i>
<i>pH in solution at 10%:</i>	<i>7,5 - 8,5</i>
<i>Phase:</i>	<i>watery</i>
<i>Use:</i>	<i>final</i>

PROPERTIES

ACRYFILL TOP MV is a casein based binder, suitable in finishing of full grain and buffed leathers, both ironed or glazed.

It forms a film that increases gloss, and gives good resistance to acetone and warm ironing.

ACRYFILL TOP MV, is used mainly for nappa and is ideal with polymerized binders as it reduces its stickiness during the warm ironing stage.
