

ACRYFILL WAX 33C

CHEMICAL COMPOSITION

Waxes, softeners

CHARACTERISTICS

<i>Appearance:</i>	<i>milky white liquid</i>
<i>pH in solution at 10%:</i>	<i>3 - 4</i>
<i>Phase:</i>	<i>watery</i>
<i>Product uses:</i>	<i>base coats, coverings, water fixation</i>

PROPERTIES

ACRIFILL WAX 33C in an emulsion of synthetic softeners that gives a pleasant feel and round grain to the leather.

It is mostly applied by adding it to the base coats on full-grain leathers in the amount from 10 to 20% by water fixations. Besides, it presents anti-adhesive characteristics.
