

ACRYFILL WAX 88

CHEMICAL COMPOSITION

Paraffin emulsion

CHARACTERISTICS

<i>Appearance:</i>	<i>white liquid</i>
<i>pH in solution at 10%:</i>	<i>7 - 9</i>
<i>Ionic Charge:</i>	<i>anionic</i>

PROPERTIES

ACRIFILL WAX 88 is a anionic emulsion of paraffin, very suitable to obtain pull-up effects, either on full or corrected grain.

ACRYFILL WAX 88 also has excellent sealing features, reduces absorption and confers smooth and homogeneous look, without affecting the final top adhesion.
