<i>Appearance:</i>	<i>white liquid</i>
<i>Active matter:</i>	<i>about 10%</i>
<i>pH in solution at 10%:</i>	<i>9 - 10</i>
<i>Warning:</i>	<i>shake well before use</i>

### PROPERTIES

**ACRYFILL WAX M10** is an excellent auxiliary to be used in watery finishing, to facilitate plating and printing of the same.

**ACRYFILL WAX M10** being an emulsion of soft waxes, has thermos-plasticity characteristics and detachment properties from the plate during the ironing stage.

It gives a waxy and soft touch to the leather, ideal for nappa finishing.

### USE

It's suggested to use 5-30% depending on the weight of the resins.
