

ACRYFILL WAX M52

CHEMICAL COMPOSITION

Emulsion of special waxes in water

CHARACTERISTICS

<i>Appearance:</i>	<i>creamy liquid</i>
<i>Active matter:</i>	<i>about 7,5%</i>
<i>pH in solution at 10%:</i>	<i>9 - 10</i>

PROPERTIES

ACRYFILL WAX M52 is an excellent auxiliary to be used in watery finishing, to facilitate plating and printing of the same.

ACRYFILL WAX M52 being an emulsion of soft waxes, has ther-mos-plasticity characteristics and detachment properties from the plate during the ironing stage.

It gives a waxy and soft touch to the leather, ideal for nappa finishing.

USE

It's suggested to use 5-30% depending on the weight of the resins.
