

ACRYLAC FINISH W BM/I

CHEMICAL COMPOSITION

No colour emulsified lacquer

CHARACTERISTICS

<i>Appearance:</i>	<i>milky white liquid</i>
<i>Active matter:</i>	<i>about 18%</i>
<i>Phase:</i>	<i>watery / organic</i>
<i>Use:</i>	<i>top coats</i>

PROPERTIES

ACRYLAC FINISH W BM/I is a nitrocellulose in watery emulsion. Its normally used in top coats where good gloss is required. Furthermore, **ACRYLAC FINISH W BM/I** gives a pleasant touch to the leather, is suitable as an intermediate, and can add used with ACRYFILL SOFT (touch) range. If used in the final phase, hand can be changed as per own choice.

USE

Dilute 1:0,5 with water to maintain high shine level or dilute 1:1 (mix 50 pp of water + 5 pp of butylglycol acetate or methoxypropanol as the case may be) o obtain lower shine
