

## BERGANIL EHT

*PENETRATING AUXILIARY FOR FINISHING*

### CHARACTERISTICS

<i>Appearance:</i>	<i>milky liquid</i>
<i>pH in emulsion to 10%:</i>	<i>6,5 - 7,5</i>
<i>Ionic charge :</i>	<i>no-ionic</i>
<i>Compatibility :</i>	<i>miscible in each portion of water. Compatible with anionic and no-ionic resin.</i>

### PROPERTIES

**BERGANIL EHT** is a finishing auxiliary that mixed with emulsion resins or in water solution, it increases the penetration of each type of leather.

excellent results have been employing **BERGANIL EHT** in the mixture to be applied to buffer or with the curtain coater machine.

However, given its considerable wetting and penetrating power, we recommended to use it only in the first finishing coat, although with the drying doesn't exercise any influence on further hands.

### USE

The percentage of **BERGANIL EHT** to add to resins, depend on the desired penetration grade.
