

## SINTOIL 126

### CHEMICAL COMPOSITION

Self-emulsifiable natural oil

#### CHARACTERISTICS

<i>Appearance:</i>	<i>yellow oily liquid</i>
<i>pH in soluzione al 10%:</i>	<i>6,5 - 7,5</i>
<i>Active matter:</i>	<i>100%</i>

### PROPERTIES

**SINTOIL 126** has the characteristics of a natural oil but unlike this, it's a self emulsifier and does not require adding of other emulsifiers.

**SINTOIL 126** has to be emulsified with water 15-20°, from an emulsion which is stable in acid bath till ph 3 and in presence of electrolytes.

**SINTOIL 126** has a lubricating action on the grain without conditioning negatively the finishing.

Leathers treated with **SINTOIL 126**, in finishing have a very uniform wettability to the mechanical operations, optimum adherence of the films and excellent reactivity.
