

SINTOIL 44 FE

CHEMICAL COMPOSITION

Selected mixture of oils

CHARACTERISTICS

<i>Appearance:</i>	<i>Straw liquid</i>
<i>Active matter:</i>	<i>100%</i>
<i>pH in emulsion to 10%:</i>	<i>6,5 - 7,5</i>

PROPERTIES

SINTOIL 44 FE is a mix of oils with particular light fastness characteristics. If used as a fatliquor in finishing, gives a dry and warm hand to the leather with darkening effect. **SINTOIL 44 FE** is normally used for pull-up effects, and its very much appropriate to be used on the flesh side, where it slow downs penetration of oils or waxes applied on the grain; used on flesh side does not stain contact liners and does not compromise gluing.
