

ANTISTRAPPO CF4

AUXILIARY FOR FATLIQUOR

CHEMICAL COMPOSITION

Chlorine sodium alkanesulfonate

CHARACTERISTICS

<i>Appearance:</i>	<i>yellowish oily liquid</i>
<i>Active substance:</i>	<i>about 100%</i>
<i>Solubility:</i>	<i>insoluble</i>
<i>Ionic charge:</i>	<i>anionic</i>
<i>Compatibility:</i>	<i>anionic and non ionic</i>

PROPERTIES

ANTISTRAPPO CF4 is an auxiliary particularly suitable to increase dermic fibres elasticity, not only as fibres but also on the fibrils that compose them. It is preferably used in retanning, added to the floats in the beginning of operation, or as last additive. The treated leathers are very open and thoroughly lubricated, resulting in stronger tensile and stich-tear resistance.

Another advantage is that an open leather better agree the filling and fattening products.

USAGE METHOD

Non being dispersable in water, it is recommended to mix it with part of fatliquors.
