

BERFAT C1

FATLIQUOR FOR HIDES

CHEMICAL COMPOSITION

Fatliquor based on selected fish oils and sulphites

CHARACTERISTICS

<i>Appearance:</i>	<i>reddish oily</i>
<i>Fatty matter:</i>	<i>75 - 80%</i>
<i>pH in solution at 10%:</i>	<i>7,5 - 8,5</i>
<i>Ionic charge:</i>	<i>anionic</i>
<i>Compatibility:</i>	<i>stable in large zones of pH</i>
<i>Stability in storage:</i>	<i>6 months under normal conditions</i>
<i>Stability to chrome:</i>	<i>yes</i>
<i>Stability to electrolytes:</i>	<i>yes</i>

We guarantee the quality of our products in respect of the general sales and supply terms and conditions.

PROPERTIES

BERFAT C1 is a fatliquor formulated with the scope of obtaining an ideal equilibrium between penetration and fibrillar filling.

If used on its own as the only component of the fatliquor formula, it confers to the hide a soft, full touch and a silky touch to the surface.

BERFAT C1 can be used in mixtures with other oils, especially when there are difficult penetrations given their characteristic of fatty, coarse and milky emulsion.

The high penetrating power of **BERFAT C1** transports these coarse emulsions and contributes to their distribution in depth.

USAGE METHOD

It is recommended to use it in proportions that vary from 10 – 19% as the only fatliquor and from 3 – 5% in union with other fatliquors to give a roundness and improve the softness of the hide.
