

BERFAT PS100

FATLIQUOR FOR TANNING USE

CHEMICAL COMPOSITION

Whole fatliquor based on fat animals substances

CHARACTERISTICS

<i>Appearance:</i>	<i>yellowish creamy paste</i>
<i>Solubility:</i>	<i>insoluble</i>

PROPERTIES

BERFAT PS100 is a combination of various whole oils. This mixture is exclusively used on vegetable tanned leathers, and its principal components are yellowish fish oil and selected tallow.

BERFAT PS100 thanks to its particular characteristics is used as only fatliquor to realise footwear articles, giving a full grain (as Kip).

BERFAT PS100 is exclusively used on pressed leathers (moisture-free), after the sweating of leathers in wooden drums for minimum two hours, adding the product without the aid of water.

After a trial, can be added whole oils of various nature in the desired percentage.
