<i>Active substance:</i>	<i>70 – 75%</i>
<i>pH in solution at 10%:</i>	<i>6 - 7</i>
<i>Ionic charge:</i>	<i>anionic</i>

PROPERTIES

BERFAT SPC is a product formulated to obtain on the skins the same greasing characteristics given by natural sperm oil.

BERFAT SPC thanks to its particular chemical characteristics, gives the skins a good fullness, an excellent softness and silky feel.

BERFAT SPC is also suitable for vegetable and mixed tanning, thanks to its high penetrating and light fastness characteristics.
