

## BERGANIL DR

*PENETRATING/DISPERSIVE DYEING AUXILIARY*

### CHARACTERISTICS

<i>Appearance:</i>	<i>straw-coloured liquid</i>
<i>pH in solution at 10%:</i>	<i>7,5 - 8,5</i>
<i>Chemical character:</i>	<i>weakly cationic</i>

### PROPERTIES

**BERGANIL DR** is a penetrating/dispersive auxiliary for the dyeing of leather and thanks to its dispersive properties and its equalizing power towards colorants it permits uniform and standard dyeing.

### USAGE METHOD

0,1% to 0,3% is used for dyeing equalization.  
0,5% to 1% is used to obtain passing colours.
