<i>pH in solution at 10%:</i>	<i>7 - 8</i>
<i>Enzymatic unit:</i>	<i>L.V. approximately 5000</i>
<i>Activity field:</i>	<i>pH 7 - 8</i>

PROPERTIES

BERMASIN G5000 is a classic macerator for precious hides such as calf skins and young goat's skins, where it thoroughly cleans the grain, making it fine and elastic.

BERMASIN G5000 if used in low percentages, can be used for the processing of hides that must preserve a sustained touch. If used in greater doses, it can be used for soft hides such as nappa and softy. The action of **BERMASIN G5000** is energetic and processing times must be followed carefully because they must never be too prolonged.
