

## BERMASI 1000

MACERATOR FOR TANNING USE

### CHEMICAL COMPOSITION

Mixture of pancreatic enzymes

### CHARACTERISTICS

<i>Appearance:</i>	<i>white powder</i>
<i>pH in 10% solution:</i>	<i>5,5 – 6,5</i>
<i>Enzymatic units:</i>	<i>L.V. approximately 1000</i>

### PROPERTIES

**BERMASI 1000** classic macerator for precious hides such as calf skins and young goat's skins, where it thoroughly cleans the grain, making it fine and elastic. **BERMASI 1000** used in low percentages, can be used for the processing of hides that must preserve a sustained touch. If used in greater doses, it can be used for soft hides such as nappa and softy.

The action of **BERMASI 1000** energetic and processing times must be followed carefully because they must never be too prolonged.

## USAGE METHOD

Recommended doses are listed here for some of the most common types of hides processed:

- 0.4% to 0.8% is used for calf skins for shoe uppers
- 0.4% to 0.8% is used for bovine hides for shoe uppers
- 1% to 1.5% is used for bovine hides for nappa
- 1.5% to 2% is used for young goat's skins
- 0.6% to 0.8% is used for ram's skins for shoe uppers or linings
- 1.5% to 2.5% is used for pigskins for clothing
