

BERMASI 10000

SUPERCONCENTRATED BATING PRODUCT

CHEMICAL COMPOSITION

Combination of pancreatic enzymes

CHARACTERISTICS

Appearance: light brown-coloured powder

pH in solution at 10%: 5,5 – 6,5

Enzymatic units: about 10000

FREE FROM AMMONIUM SULPHATE

PROPERTIES

BERMASI 10000 is a highly concentrated enzymatic bating agent, mostly sold in foreign countries in order to transport less product but at very high concentration; pay great attention to weight and dosage.

BERMASI 10000 is produced with the same quality as the pancreatic enzymes of the active principles of trypsin, amylase and lipase of the whole BERMASI series.
