

BIOLICKER V7

VEGETABLE BIO-LUBRICANT FOR TANNING USE

CHEMICAL COMPOSITION

Sulphitated natural oils

CHARACTERISTICS

<i>Appearance:</i>	<i>reddish oily liquid</i>
<i>Active substance:</i>	<i>65 - 70%</i>
<i>pH in solution at 10%:</i>	<i>7,5 - 8,5</i>
<i>Ionic charge:</i>	<i>anionic</i>
<i>Resistance to light:</i>	<i>good</i>

PROPERTIES

BIOLICKER V7 is a sulphitated ecological bio-lubricant, without whole oils, with a high softening power on hides.

BIOLICKER V7 is a fatliquor that enters in depth, thoroughly lubricating all the section of the hide. Furthermore, it favours the penetration of any other natural or sulphitated oils of the fatliquoring mixture.

BIOLICKER V7 is indicated for light and soft hides such as nappa and suede for clothing. Furthermore, it can be used on bovine hides for "softy" articles and/or general drummed articles. It has an optimum resistance to light.

USAGE METHOD

BIOLICKER V7 can be used alone or in combination with others fatliquors in percentage from 6 to 10%, according to required article.
