

## DECALMIX SBR

*DELIMING POWDER*

### **CHEMICAL COMPOSITION**

Mixture of salts and buffered acids

### **CHARACTERISTICS**

*Appearance:* *clear powder*

*pH in solution at 10%:* *2,5 – 3,5*

### **PROPERTIES**

Its formulation makes it very penetrating and with a delimiting action stratigraphically uniform, fast and gentle. The pH of the solution: 2.5 to 3.5 avoids any swelling of the skin while still providing a complete elimination of lime. **DECALMIX SBR** is used on all types of skin.

### **USAGE METHOD**

In the bath with 100% water at 35 ° C. Usage dosage from 0.5 to 1.5%.
