

DIMITROL BB3

WHITE FOR DRUM

CHARACTERISTICS

<i>Appearance:</i>	<i>white fluid paste</i>
<i>pH in solution at 10%:</i>	<i>7 - 8</i>
<i>Active matter:</i>	<i>25 - 30</i>
<i>Charge:</i>	<i>anionic</i>

PROPERTIES

DIMITROL BB3 is a titanium dioxide pigment with anionic character. **DIMITROL BB3** is used in the fatliquoring phase, blended with the products normally used, or at the end of this operation. Moreover, **DIMITROL BB3** can be used as dispersing agent in solution with acid dyestuffs, to obtain very light pastel shades, providing the treated leathers with dyeing evenness and natural look.

USAGE METHOD

DIMITROL BB3 use percentages vary from 2% to 10 – 12% on shaved weight depending on leather thickness and requested degree of white, and obviously on the article desired.
