

## ECOTAN VEM

AUXILIARY PRODUCT FOR TANNING USE

### CHEMICAL COMPOSITION

Mixture of vegetable tannins

### CHARACTERISTICS

<i>Appearance:</i>	<i>light brown powder</i>
<i>pH in 10% solution:</i>	<i>4,5 – 5,5</i>

### PROPERTIES

**ECOTAN VEM** is a combination of clear vegetable tannins and it can be used in vegetable tanning and retanning of leathers tanned with chromium salts.

Thanks to its characteristics it is used for nappa and upholstery articles.

**ECOTAN VEM** being a vegetable tannin is very sensitive to iron ions, for this recommended to add in the normal production cycle a sequestering iron.
