

## ELCATAN BC

SYNTHETIC TANNIN FOR LEATHER

### CHEMICAL COMPOSITION

Synthetic tannin based on phenol

### CHARACTERISTICS

<i>Appearance:</i>	<i>fine white powder</i>
<i>pH in solution at 10%:</i>	<i>3 – 4</i>

### PROPERTIES

**ELCATAN BC** is a synthetic tannin based on phenol that is recommended for the retanning of soft leathers such as sheepskin and goatskin for clothing. It can be used for the tanning of kip.

**ELCATAN BC** confers fullness, great softness and firmness of the grain to the hide.

### USAGE METHOD

On leathers for clothing, a percentage from 3 to 5% on the shaved weight is recommended, whilst it can be used in the tanning of kip by substituting approximately 50% of the tanning agent used.
