

ELCATAN HFN

SYNTHETIC TANNIN FOR HIDES

CHEMICAL COMPOSITION

Synthetic tannin based on phenol

CHARACTERISTICS

<i>Appearance:</i>	<i>beige coloured powder</i>
<i>pH in 10% solution:</i>	<i>7,5 – 8,5</i>

PROPERTIES

ELCATAN HFN is a synthetic tannin based on phenol and recommended for retanning soft skins such as clothing of sheep and goat. It can also be used for tanning kip.

ELCATAN HFN gives the skin fullness, great softness and a firm grain.

USAGE METHOD

On leathers for clothing a percentage from 3 to 5% is recommended on shaved weight, while used in tanning kip, it can replace about 50% of the tanning agent used.
