

ELCATAN N CONC

SYNTHETIC TANNIN FOR LEATHER

CHEMICAL COMPOSITION

Synthetic tannin based on phenol, free from formaldehyde

CHARACTERISTICS

<i>Appearance:</i>	<i>clear powder</i>
<i>pH in 10% solution:</i>	<i>3,5 – 4,5</i>

PROPERTIES

ELCATAN N CONC is a synthetic tannin based on phenol that is recommended for the retanning of soft leathers such as sheepskin and goatskin for clothing. It can be used for the tanning of kip.

ELCATAN N CONC confers fullness, great softness and firmness of the grain to the hide.

USAGE METHOD

On leathers for clothing, a percentage from 2 to 4% on the shaved weight is recommended, whilst it can be used in the tanning of kip by substituting approximately 50% of the tanning agent used.
