

ELCATAN R7

RETANNING RESIN

CHEMICAL COMPOSITION

Dicyandiamide-resin-based product

CHARACTERISTICS

<i>Appearance:</i>	<i>clear powder</i>
<i>pH in solution at 10%:</i>	<i>8 - 9</i>
<i>Ionic charge:</i>	<i>anionic</i>

PROPERTIES

ELCATAN R7 is a tanning agent based on anionic dicyandiamide resin.

ELCATAN R7 is particularly suitable to re-tan chrome leathers, providing very good filling effect in the emptier parts of leather.

ELCATAN R7 allows to obtain very good firm grain and leather fullness. It is particularly suitable to re-tan lining, kips, chrome veals and bellies.
