

## ELCATAN R7 CONC

*RETANNING RESIN*

### CHEMICAL COMPOSITION

Product based on concentrated dicyandiamide-resin

#### CHARACTERISTICS

<i>Appearance:</i>	<i>clear powder</i>
<i>pH in emulsion at 10%:</i>	<i>8 - 9</i>
<i>Ionic charge:</i>	<i>anionic</i>

### PROPERTIES

**ELCATAN R7 CONC** is a tanning agent based on anionic dicyandiamide-resin.

**ELCATAN R7 CONC** is particularly indicated for the retanning of chrome leathers to which it confers an optimum filling in the most empty parts of the hide.

**ELCATAN R7 CONC** assists in obtaining an optimum firm grain and fullness of the hide. It is used in the retanning of linings, kips, chrome calskins and sides.
