Mixture of vegetable tannins

CHARACTERISTICS

| | |
|----------------------------|---------------------------|
| <i>Appearance:</i> | <i>light brown powder</i> |
| <i>pH in 10% solution:</i> | <i>6 - 7</i> |

PROPERTIES

ELCATAN TMP is a combination of clear vegetable tannins and it can be used in vegetable tanning and retanning of leathers tanned with chromium salts.

Thanks to its characteristics it is used for nappa and upholstery articles.

ELCATAN TMP being a vegetable tannin is very sensitive to iron ions, for this recommended to add in the normal production cycle a sequestering iron.
