

ELCATAN TN

TANNIN FOR RETANNING/NEUTRALISING

CHEMICAL COMPOSITION

Product based on naphthalene-sulphonic and buffered salts

CHARACTERISTICS

<i>Appearance:</i>	<i>clear powder</i>
<i>pH in solution at 10%:</i>	<i>7 - 8</i>

PROPERTIES

ELCATAN TN is a neutralising tannin used on its own or in combination with neutralising salts, such as formates and bicarbonates to obtain soft and full hides.

ELCATAN TN is also used for dyeing where it has excellent penetration power.
