

## ELCATAN TN4

RETANNING/NEUTRALISING TANNIN

### CHEMICAL COMPOSITION

Mixture of tannins and buffered salts

### CHARACTERISTICS

<i>Appearance:</i>	<i>white powder</i>
<i>pH in solution at 10%:</i>	<i>8 - 9</i>

### PROPERTIES

**ELCATAN TN4** is a neutralising tannin used for chrome leathers. It does not overload the grain and improves the fullness thereby obtaining a leather with a more round touch.

**ELCATAN TN4** also has a good buffering power with a sweet retanning effect. For this reason, it is used in the neutralisation process and chrome retanning.

### USAGE METHOD

1% to 3% is used in neutralisation.  
0.5% to 2% is used in retanning.
