

ELCATAN VSC

SYNTAN FOR WHITE LEATHERS

CHEMICAL COMPOSITION

Phenol ureic condensation product

CHARACTERISTICS

<i>Appearance:</i>	<i>clear powder</i>
<i>pH in 10% solution:</i>	<i>3,5 – 4,5</i>

PROPERTIES

ELCATAN VSC can be widely used as tanning and lightening agent on chrome and vegetable leathers. The product is light-fast but sensitive to ferrous ions, therefore we recommend to use it adopting the necessary precautions to avoid stain formation.

ELCATAN VSC provides very good results in the retannage of chrome leathers for white, providing very fine grain and soft touch.

USAGE METHOD

6-12% on shaved weight to re-tan chrome leathers for white.

1-3% on shaved weight, in blend with vegetable tannins, for chrome leather retanning.

10% on shaved weight for a clear topping on vegetable tanned leathers.
