

## ELCATAN WL

RETANNING AGENT

### CHEMICAL COMPOSITION

Condensation product of aromatic sulphonic acids

#### CHARACTERISTICS

<i>Appearance:</i>	<i>syropy liquid</i>
<i>pH in solution at 10%:</i>	<i>3,5 – 4,5</i>
<i>Active substance:</i>	<i>40 – 45%</i>

#### PROPERTIES

**ELCATAN WL** is a phenolic based synthetic tannage which produces full and white leather. It can be used to tanning on its own, or in combination with vegetable tannins and for retanning processes. Leather tanned with **ELCATAN WL** alone features optimum softness, fullness and very light. Used in adequate percentages, **ELCATAN WL** is able to achieve any degree of softness and fullness. It is suitable for synthetic vegetable tannage processes on kips, linings and leather goods.

It can be used to retan clothing leather, chrome retan soft broutard, buffed and full grain leather, in retanning processes with vegetable tannins for uppers, waterproof military boots, ect.
