

EMODERMA

RETANNING AUXILIARY

CHARACTERISTICS

<i>Appearance:</i>	<i>viscous white milky liquid</i>
<i>pH in solution at 10%:</i>	<i>6,5 – 7,5</i>
<i>Concentration:</i>	<i>65 - 70</i>

PROPERTIES

EMODERMA is used to give a “humid” effect to the leathers: its used in the fatliquor mixture and thanks to its “humidifying” property, gives the leather a lesser dry and arid hand after drying. Its recommended to do some precautionary trials, in order to figure out the quantity to be used ad the percentage of humidity desired.

USAGE METHOD

Suggested from 0,8 to 1,2%
