

NEUTRAL BFX

NEUTRALISER

CHEMICAL COMPOSITION

Deacidifier in powder

CHARACTERISTICS

<i>Appearance:</i>	<i>white powder</i>
<i>pH in solution at 10%:</i>	<i>7 - 8</i>
<i>Compatibility:</i>	<i>anionic and nonionic</i>

PROPERTIES

NEUTRAL BFX is a neutraliser equipped with a particular action, formed of organic and inorganic compounds that act to form complexes. By using **NEUTRAL BFX** there cannot be excess neutralisation as happens when using normal deacidifiers, however it has the advantage of not precipitating with the tanning liquid so chrome stain formation is avoided, and it also facilitates dyeing and fatliquoring.

USAGE METHOD

1% to 8% is used on the basis of the article.
