

NEUTRAL EC

NEUTRALISER

CHEMICAL COMPOSITION

Mixture of complex and buffered salts

CHARACTERISTICS

<i>Appearance:</i>	<i>white powder</i>
<i>pH in solution at 10%:</i>	<i>7 - 8</i>
<i>Compatibility:</i>	<i>with anionic and nonionic</i>

PROPERTIES

NEUTRAL EC is used to neutralise wet-blue with fine grain especially if the final article is nappa or softy.

NEUTRAL EC is normally used on its own and when a greater neutralisation of the surfaces is required.

It can be used with other traditional neutralising agents such as bicarbonate of sodium.

USAGE METHOD

1% to 8% is used on the basis of the article.
