

POLIFAT SG

FATLIQUORING POLYMER

CHEMICAL COMPOSITION

Modified softening polymer

CHARACTERISTICS

<i>Appearance:</i>	<i>colored creamy paste</i>
<i>pH in solution at 10%:</i>	<i>6 – 7</i>
<i>Active substance:</i>	<i>45 – 50%</i>

PROPERTIES

POLIFAT SG has been developed on a modified polymer base and changes the application mode of normal fatliquoring mixtures to create soft skins.

POLIFAT SG is a fatliquoring/softening polymer for clothing, furniture and footwear, replacing the combination of many fatliquors; in fact it can be used alone obtaining a high level of softness and lightness.

POLIFAT SG has good light fastness and can be used for white and light skins.

POLIFAT SG acts as a homogeneous compound, where it deeply penetrates the fibres and sets permanently.

USAGE METHOD

POLIFAT SG is used alone in a ratio from 15 to 18% depending on the desired article.
