

RESIFILL A30G

RETANNING RESIN

CHEMICAL COMPOSITION

Acrylic interpolymer

CHARACTERISTICS

<i>Appearance:</i>	<i>brown dense liquid</i>
<i>Dry content:</i>	<i>25 – 30%</i>
<i>pH in 10% sol:</i>	<i>6 - 7</i>
<i>Ionic charge:</i>	<i>anionic</i>
<i>Light fastness:</i>	<i>good</i>

PROPERTIES

RESIFILL A30G has the same characteristics as RESIFILL A30D, but the change on the polymeric tanning agent in the formula provides more gummy and fuller leathers with finer grain.

RESIFILL A30G is light-fast and can be used to obtain white leathers.
