

RINVERMASI PIK

ENZYMATIC SOAKING PRODUCT FOR PICKLED

CHEMICAL COMPOSITION

Enzyme combination

CHARACTERISTICS

<i>Appearance:</i>	<i>white powder</i>
<i>Activity field:</i>	<i>ph 3 - 6</i>
<i>Usage temperature:</i>	<i>25 - 30°C</i>

PROPERTIES

RINVERMASI PIK carries out its soaking effect in a pH field between 3 and 6, therefore it can be used to wet-back sheep, goat, ram, lamb pickled skins and chevrette.

RINVERMASI PIK is also ideal for the soaking treatment of chromed articles in wet-blue.

RINVERMASI PIK is compatible with polyphosphates and surfactants type ECOPOL 914 or ECOPOL 964, which can be used together to obtain better leather cleanness and soaking.

USAGE METHOD

You can use from 0,5% to 1% of **RINVERMASI PIK** in wet-back-stage.
