

ROTOBER C1

SPECIFIC PRODUCT FOR ROTOPRESS ROLLER CLEANING

PROPERTIES

ROTOBER C1 is a specific product developed to clean the rollers of ironing machines composed of a mirror-chromed roller in various sizes, working between 50°C and 190°C.

Mirror-chroming allows to obtain a glossy effect on leather or to close leather's grain.

In order to achieve this effect, it is very important to keep the roller always clean and shining; this product removes the dirt accumulated with leather passing, like specks, oils, waxes and various stains, due also to wrong chemicals fixing on leather.

Without suitable cleaning, the dirt of the cylinder will be transferred onto the leathers damaging them.

USAGE METHOD

Being **ROTOBER C1** an inflammable product, it is used soaking a dry cloth and passing it directly on the cylinder.

It's recommended to clean the cylinder with a temperature not higher than 80° C. With a second clean cloth the cylinder can be definitely cleaned by possible halos.
