

SEQUESTRANTE ED

BLEND OF SEQUESTERING SALTS

CHARACTERISTICS

<i>Appearance:</i>	<i>white powder</i>
<i>pH in solution at 10%:</i>	<i>10 - 11</i>

PROPERTIES

SEQUESTRANTE ED has strong sequestering power on calcium and magnesium salts.

When a strong sequestering action is requested on the mentioned anionic substances, this product can be used in soaking and washing of pelts where it carries out its sequestering action on the hard waters.

USAGE METHOD

In presence of hard waters **SEQUESTRANTE ED** is added to the washing floats in amounts of 0,2% - 0,5%.
