

SEQUESTRANTE ED CONC

CHEMICAL COMPOSITION

MIXTURE OF SEQUESTERING SALTS

CHARACTERISTICS

<i>Appearance:</i>	<i>white powder</i>
<i>pH in solution at 10%:</i>	<i>10 - 11</i>

PROPERTIES

SEQUESTRANTE ED CONC has a strong sequestering power on calcium and magnesium salts.

If an energetic sequestering action is necessary on the mentioned cations, it is used either in greening or in the washing of skinned hides where it carries out its sequestering action on hard water.

USAGE METHOD

In the presence of hard water **SEQUESTRANTE ED CONC** is added to the washing tanks in a ratio of 0.2 – 0.5%.
